

Lower Shire Valley Landscape Project

2018 - 2024

World Bank

Malawi

NATURE BASED SOLUTIONS

watershed management, grassland and other vegetation, forests, inland wetlands

The Shire Valley Transformation Program aims to increase agricultural productivity and commercialization for targeted households in the Shire Valley and to improve the sustainable management and utilization of natural resources. The project development objectives (PDO) are to provide access to reliable gravity-fed irrigation and drainage services, secure land tenure for smallholder farmers, and strengthen management of wetlands and protected areas. Additionally, the project will develop and improve wetland management.

INTERVENTION

Green

HAZARD

drought
river flooding

SCALE

Regional

RISK REDUCTION BENEFITS

carbon sequestration, climate adaptation or resilience, biodiversity or protection of natural areas
