

Malawi: Shire River Basin Management Program (Phase-I) Project

2012 - 2019

World Bank

Malawi

NATURE BASED SOLUTIONS

watershed management, forests

The Shire River Basin Management Program (Phase-I) Project aims to develop a planning framework to improve land and water management for ecosystem and livelihood benefits in target areas. The project includes Shire Basin planning, catchment management to reduce erosion and improve livelihoods, and water-related infrastructure investments to regulate Shire flows and enhance climate resilience. These efforts support disaster risk management through watershed rehabilitation and improved management.
