

Natural Resources Management in a Changing Climate in Mali

2014 - 2020

World Bank

Mali

NATURE BASED SOLUTIONS

forests, grassland and other vegetation

The Natural Resources Management in a Changing Climate Project aims to expand the adoption of sustainable land and water management practices in Mali. Key components include scaling up sustainable land management to improve biodiversity and reverse deforestation, diversifying local livelihoods to enhance resilience, and building capacity for governance and communication. The project promotes a landscape approach to protect ecosystems and their services while addressing climate change challenges.
