

# Transforming Landscapes for Resilience and Development in Zambia

2019 - 2026

**World Bank**  
Zambia

---

## NATURE BASED SOLUTIONS

forests, sustainable management

The project used farmer-led natural regeneration, which is mostly to create food forests, but also improve forest cover to reduce water runoff and maximizing rain infiltration (and protection from wind).

## LEARN MORE

---

### INTERVENTION

Green

### HAZARD

general climate resilience

### SCALE

National

## RISK REDUCTION BENEFITS

redirection & drainage of flood & storm water, carbon sequestration, increased capacity

## DONORS

World Bank
